Chemistry and Physics of LIPIDS

# Subject index

## Volume 79 (1996)

**Air/water interface**; Phosphatidylcholine; Monolayer; Bilayer; Spreading pressure **79**, 1

**1-Alkylglycerophosphocholine acetyltransferase**; Glyceryl ethers; NBD-labeled ether lipids; Phospholipase $A_2$; HPLC analysis **79**, 29

**Aminoglycosides**; Spermine; bis(β-Diethylaminoethylether)-hexestrol (DEH); Phosphatidylinositol; $^{31}$P-Nuclear magnetic resonance; Lipid polymorphism **79**, 123

**Amphiphiles**; Tubules; Chirality; Liposomes; Electron microscopy; Glycolipids **79**, 165

**Antioxidants**; Phenolics; Flavonoids; Apigenin; Kaempferol; Morin; Quercetin; Myricetin **79**, 157

**Apigenin**; Antioxidants; Phenolics; Flavonoids; Kaempferol; Morin; Quercetin; Myricetin **79**, 157

**Arachidonic acid**; Cell injury; Lipoxygenases; Hydroperoxy fatty acids; Linoleic acid **79**, 113

**Arachidonic acid**; Linoleic acid; Linolenic acid; Lipid peroxidation; 4-Hydroxynonenal; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Bishydroperoxides; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**Atherosclerosis**; LDL oxidation; HDL oxidation; Plasmalogens; 2-Hydroxyaldehydes; Lipid peroxidation **79**, 95

**Autoxidation**; Linoleic acid; Micelles; UV irradiation; UV absorption **79**, 39

**bis**(β-Diethylaminoethylether)hexestrol (DEH); Aminoglycosides; Spermine; Phosphatidylinositol; $^{31}$P-Nuclear magnetic resonance; Lipid polymorphism **79**, 123

**Benzene**; Friedel-Crafts alkylation; Toluene; Hexenes; Hexenoates; NMR spectra; Mass spectra **79**, 79

**Benzene**; Synthetic lubricants; Friedel-Crafts reaction; Methyl oleate; Toluene; NMR; Mass spectra **79**, 87

**Bilayer**; Phosphatidylcholine; Monolayer; Spreading pressure; Air/water interface **79**, 1

**Bishydroperoxides**; Arachidonic acid; Linoleic acid; Linolenic acid; Lipid peroxidation; 4-Hydroxynonenal; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**Cell injury**; Lipoxygenases; Hydroperoxy fatty acids; Linoleic acid; Arachidonic acid **79**, 113

**Chaotropic anions**; Neutral lipids; Spin label; ESR; Spectrophotometry **79**, 171

**Chiral HPLC**; Enantioselectivity; Regioselectivity; Porcine pancreas lipase; Hydrolysis; Triolein, partial glycerides; Supercritical carbon dioxide; Sumichiral OA-4100; Water content **79**, 101

**Chirality**; Amphiphiles; Tubules; Liposomes; Electron microscopy; Glycolipids **79**, 165

**C-NMR**; γ-Linolenic acid; Evening primrose oil; Triacylglycerols Grignard deacylation **79**, 9

**Diphenyl-hexatriene**; Ubiquinone; Trimethylammonium-diphenyl-hexatriene; Fluorescence anisotropy; Liposome **79**, 55

**DPH fluorescence anisotropy**; Pyrethroid; Permethrin; Liposomes; DSC; Membrane fluidity **79**, 21

**DSC**; Pyrethroid; Permethrin; Liposomes; Membrane fluidity; DPH fluorescence anisotropy **79**, 21

**Electron microscopy**; Amphiphiles; Tubules; Chirality; Liposomes; Glycolipids **79**, 165

**Enantioselectivity**; Regioselectivity; Porcine pancreas lipase; Hydrolysis; Triolein, partial glycerides; Supercritical carbon dioxide; Chiral HPLC; Sumichiral OA-4100; Water content **79**, 101

**ESR**; Neutral lipids; Chaotropic anions; Spin label; Spectrophotometry **79**, 171

**Evening primrose oil**; γ-Linolenic acid; Triacylglycerols Grignard deacylation; C-NMR **79**, 9

**Flavonoids**; Antioxidants; Phenolics; Apigenin; Kaempferol; Morin; Quercetin; Myricetin **79**, 157

**Fluorescence anisotropy**; Ubiquinone; Diphenyl-hexatriene; Trimethylammonium-diphenyl-hexatriene; Liposome **79**, 55

**Friedel-Crafts alkylation**; Benzene; Toluene; Hexenes; Hexenoates; NMR spectra; Mass spectra **79**, 79

**Friedel-Crafts reaction**; Synthetic lubricants; Methyl oleate; Benzene; Toluene; NMR; Mass spectra **79**, 87

**Glyceryl ethers**; NBD-labeled ether lipids; Phospholipase $A_2$; 1-Alkylglycerophosphocholine acetyltransferase; HPLC analysis **79**, 29

**Glycolipids**; Amphiphiles; Tubules; Chirality; Liposomes; Electron microscopy **79**, 165

**Glycosphingolipids**; Micelles; Light scattering **79**, 137

**5α-hydroperoxycholesterol**; Oxysterols; Oxidized human LDL; Mass spectrometry **79**, 181

**HDL oxidation**; LDL oxidation; Plasmalogens; 2-Hydroxyaldehydes; Lipid peroxidation; Atherosclerosis **79**, 95

**Hexenes**; Friedel-Crafts alkylation; Benzene; Toluene; Hexenoates; NMR spectra; Mass spectra **79**, 79

**Hexenoates**; Friedel-Crafts alkylation; Benzene; Toluene; Hexenes; NMR spectra; Mass spectra **79**, 79

**Highly fluorinated phospholipids**; Molecular packing; Monolayers; Phosphatidylcholines **79**, 71

**HPLC analysis**; Glyceryl ethers; NBD-labeled ether lipids; Phospholipase $A_2$; 1-Alkylglycerophosphocholine acetyltransferase **79**, 29

**Hydrolysis**; Enantioselectivity; Regioselectivity; Porcine pancreas lipase; Triolein, partial glycerides; Supercritical carbon dioxide; Chiral HPLC; Sumichiral OA-4100; Water content **79**, 101

**Hydroperoxy fatty acids**; Cell injury; Lipoxygenases; Linoleic acid; Arachidonic acid **79**, 113

α-Hydroxyaldehydes; Arachidonic acid; Linoleic acid; Linolenic acid; Lipid peroxidation; 4-Hydroxynonenal; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Bishydroperoxides; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**2-Hydroxyaldehydes**; LDL oxidation; HDL oxidation; Plasmalogens; Lipid peroxidation; Atherosclerosis **79**, 95

**Hydroxyhydroperoxides**; Arachidonic acid; Linoleic acid; Linolenic acid; Lipid peroxidation; 4-Hydroxynonenal; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Bishydroperoxides; Mechanism of lipid peroxidation **79**, 47

**4-Hydroxynonenal**; Arachidonic acid; Linoleic acid; Linolenic acid; Lipid peroxidation; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Bishydroperoxides; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**Hydroxy-oxo-fatty acids**; Arachidonic acid; Linoleic acid; Linolenic acid; Lipid peroxidation; 4-Hydroxynonenal; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Bishydroperoxides; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**Kaempferol**; Antioxidants; Phenolics; Flavonoids; Apigenin; Morin; Quercetin; Myricetin **79**, 157

**lipid density**; Phosphatidylcholine vesicles; video microscopy **79**, 147

**LDL oxidation**; HDL oxidation; Plasmalogens; 2-Hydroxyaldehydes; Lipid peroxidation; Atherosclerosis **79**, 95

**Light scattering**; Micelles; Glycosphingolipids **79**, 137

**Linoleic acid**; Arachidonic acid; Linolenic acid; Lipid peroxidation; 4-Hydroxynonenal; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Bishydroperoxides; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**Linoleic acid**; Autoxidation; Micelles; UV irradiation; UV absorption **79**, 39

**Linoleic acid**; Cell injury; Lipoxygenases; Hydroperoxy fatty acids; Arachidonic acid **79**, 113

**Linolenic acid**; Arachidonic acid; Linoleic acid; Lipid peroxidation; 4-Hydroxynonenal; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Bishydroperoxides; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**γ-Linolenic acid**; Evening primrose oil; Triacylglycerols Grignard deacylation; C-NMR **79**, 9

**Lipid bilayer swelling**; Lipid-protein interaction; Lipid gel phases **79**, 65

**Lipid gel phases**; Lipid-protein interaction; Lipid bilayer swelling **79**, 65

**Lipid peroxidation**; Arachidonic acid; Linoleic acid; Linolenic acid; 4-Hydroxynonenal; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Bishydroperoxides; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**Lipid peroxidation**; LDL oxidation; HDL oxidation; Plasmalogens; 2-Hydroxyaldehydes; Atherosclerosis **79**, 95

**Lipid polymorphism**; Aminoglycosides; Spermine; bis(β-Diethylaminoethylether)hexestrol (DEH); Phosphatidylinositol; $^{31}$P-Nuclear magnetic resonance **79**, 123

**Lipid-protein interaction**; Lipid gel phases; Lipid bilayer swelling **79**, 65

**Liposomes**; Amphiphiles; Tubules; Chirality; Electron microscopy; Glycolipids **79**, 165

**Liposomes**; Pyrethroid; Permethrin; DSC; Membrane fluidity; DPH fluorescence anisotropy **79**, 21

**Liposome**; Ubiquinone; Diphenyl-hexatriene; Trimethylammonium-diphenyl-hexatriene; Fluorescence anisotropy **79**, 55

**Lipoxygenases**; Cell injury; Hydroperoxy fatty acids; Linoleic acid; Arachidonic acid **79**, 113

**Mass spectra**; Friedel-Crafts alkylation; Benzene; Toluene; Hexenes; Hexenoates; NMR spectra **79**, 79

**Mass spectra**; Synthetic lubricants; Friedel-Crafts reaction; Methyl oleate; Benzene; Toluene; NMR **79**, 87

**Mass spectrometry**; Oxysterols; Oxidized human LDL; 5α-hydroperoxycholesterol **79**, 181

**Mechanism of lipid peroxidation**; Arachidonic acid; Linoleic acid; Linolenic acid; Lipid peroxidation; 4-Hydroxynonenal; α-Hydroxyaldehydes; n-1-Hydroxy-n-oxo acids; Hydroxy-oxo-fatty acids; Bishydroperoxides; Hydroxyhydroperoxides **79**, 47

**Membrane fluidity**; Pyrethroid; Permethrin; Liposomes; DSC; DPH fluorescence anisotropy **79**, 21

**Methyl oleate**; Synthetic lubricants; Friedel-Crafts reaction; Benzene; Toluene; NMR; Mass spectra **79**, 87

**Micelles**; Autoxidation; Linoleic acid; UV irradiation; UV absorption **79**, 39

**Micelles**; Glycosphingolipids; Light scattering **79**, 137

**Molecular packing**; Highly fluorinated phospholipids; Monolayers; Phosphatidylcholines **79**, 71

**Monolayer**; Phosphatidylcholine; Bilayer; Spreading pressure; Air/water interface **79**, 1

**Monolayers**; Highly fluorinated phospholipids; Molecular packing; Phosphatidylcholines **79**, 71

**Monomolecular film**; Phospholipase D; Porcine pancreatic lipase; Surface pressure **79**, 107

**Morin**; Antioxidants; Phenolics; Flavonoids; Apigenin; Kaempferol; Quercetin; Myricetin **79**, 157

**Myricetin**; Antioxidants; Phenolics; Flavonoids; Apigenin; Kaempferol; Morin; Quercetin **79**, 157

**n-1-Hydroxy-n-oxo acids**; Arachidonic acid; Linoleic acid; Linolenic acid; Lipid peroxidation; 4-Hydroxynonenal; α-Hydroxyaldehydes; Hydroxy-oxo-fatty acids; Bishydroperoxides; Hydroxyhydroperoxides; Mechanism of lipid peroxidation **79**, 47

**NBD-labeled ether lipids**; Glyceryl ethers; Phospholipase $A_2$; 1-Alkylglycerophosphocholine acetyltransferase; HPLC analysis **79**, 29

**Neutral lipids**; Chaotropic anions; Spin label; ESR; Spectrophotometry **79**, 171

**NMR spectra**; Friedel-Crafts alkylation; Benzene; Toluene; Hexenes; Hexenoates; Mass spectra **79**, 79

**NMR**; Synthetic lubricants; Friedel-Crafts reaction; Methyl oleate; Benzene; Toluene; Mass spectra **79**, 87

**Oxidized human LDL**; Oxysterols; 5α-hydroperoxycholesterol; Mass spectrometry **79**, 181

**Oxysterols**; Oxidized human LDL; 5α-hydroperoxycholesterol; Mass spectrometry **79**, 181

**Permethrin**; Pyrethroid; Liposomes; DSC; Membrane fluidity; DPH fluorescence anisotropy **79**, 21

**Phenolics**; Antioxidants; Flavonoids; Apigenin; Kaempferol; Morin; Quercetin; Myricetin **79**, 157

**Phosphatidylcholine**; Monolayer; Bilayer; Spreading pressure; Air/water interface **79**, 1

**Phosphatidylcholines**; Highly fluorinated phospholipids; Molecular packing; Monolayers **79**, 71

**Phosphatidylcholine vesicles**; video microscopy; lipid density **79**, 147

**Phosphatidylinositol**; Aminoglycosides; Spermine; bis(β-Diethylaminoethylether)hexestrol (DEH); $^{31}$P-Nuclear magnetic resonance; Lipid polymorphism **79**, 123

**Phospholipase $A_2$**; Glyceryl ethers; NBD-labeled ether lipids; 1-Alkylglycerophosphocholine acetyltransferase; HPLC analysis **79**, 29

**Phospholipase D**; Porcine pancreatic lipase; Monomolecular film; Surface pressure **79**, 107

**Plasmalogens**; LDL oxidation; HDL oxidation; 2-Hydroxyaldehydes; Lipid peroxidation; Atherosclerosis **79**, 95

**$^{31}$P-Nuclear magnetic resonance**; Aminoglycosides; Spermine; bis(β-Diethylaminoethylether)hexestrol (DEH); Phosphatidylinositol; Lipid polymorphism **79**, 123

**Porcine pancreas lipase**; Enantioselectivity; Regioselectivity; Hydrolysis; Triolein, partial glycerides; Supercritical carbon dioxide; Chiral HPLC; Sumichiral OA-4100; Water content **79**, 101

**Porcine pancreatic lipase**; Phospholipase D; Monomolecular film; Surface pressure **79**, 107

**Pyrethroid**; Permethrin; Liposomes; DSC; Membrane fluidity; DPH fluorescence anisotropy **79**, 21

**Quercetin**; Antioxidants; Phenolics; Flavonoids; Apigenin; Kaempferol; Morin; Myricetin **79**, 157

**Regioselectivity**; Enantioselectivity; Porcine pancreas lipase; Hydrolysis; Triolein, partial glycerides; Supercritical carbon dioxide; Chiral HPLC; Sumichiral OA-4100; Water content **79**, 101

**Spectrophotometry**; Neutral lipids; Chaotropic anions; Spin label; ESR **79**, 171

**Spermine**; Aminoglycosides; bis(β-Diethylaminoethylether)hexestrol (DEH); Phosphatidylinositol; $^{31}$P-Nuclear magnetic resonance; Lipid polymorphism **79**, 123

**Spin label**; Neutral lipids; Chaotropic anions; ESR; Spectrophotometry **79**, 171

**Spreading pressure**; Phosphatidylcholine; Monolayer; Bilayer; Air/water interface **79**, 1

**Sumichiral OA-4100**; Enantioselectivity; Regioselectivity; Porcine pancreas lipase; Hydrolysis; Triolein, partial glycerides; Supercritical carbon dioxide; Chiral HPLC; Water content **79**, 101

**Supercritical carbon dioxide**; Enantioselectivity; Regioselectivity; Porcine pancreas lipase; Hydrolysis; Triolein, partial glycerides; Chiral HPLC; Sumichiral OA-4100; Water content **79**, 101

**Surface pressure**; Phospholipase D; Porcine pancreatic lipase; Monomolecular film **79**, 107

**Synthetic lubricants**; Friedel-Crafts reaction; Methyl oleate; Benzene; Toluene; NMR; Mass spectra **79**, 87

**Toluene**; Friedel-Crafts alkylation; Benzene; Hexenes; Hexenoates; NMR spectra; Mass spectra **79**, 79

**Toluene**; Synthetic lubricants; Friedel-Crafts reaction; Methyl oleate; Benzene; NMR; Mass spectra **79**, 87

**Triacylglycerols Grignard deacylation**; γ-Linolenic acid; Evening primrose oil; C-NMR **79**, 9

**Trimethylammonium-diphenyl-hexatriene**; Ubiquinone; Diphenyl-hexatriene; Fluorescence anisotropy; Liposome **79**, 55

**Triolein, partial glycerides**; Enantioselectivity; Regioselectivity; Porcine pancreas lipase; Hydrolysis; Supercritical carbon dioxide; Chiral HPLC; Sumichiral OA-4100; Water content **79**, 101

**Tubules**; Amphiphiles; Chirality; Liposomes; Electron microscopy; Glycolipids **79**, 165

**Ubiquinone**; Diphenyl-hexatriene; Trimethylammonium-diphenyl-hexatriene; Fluorescence anisotropy; Liposome **79**, 55

**UV absorption**; Autoxidation; Linoleic acid; Micelles; UV irradiation **79**, 39

**UV irradiation**; Autoxidation; Linoleic acid; Micelles; UV absorption **79**, 39

**video microscopy**; Phosphatidylcholine vesicles; lipid density **79**, 147

**Water content**; Enantioselectivity; Regioselectivity; Porcine pancreas lipase; Hydrolysis; Triolein, partial glycerides; Supercritical carbon dioxide; Chiral HPLC; Sumichiral OA-4100 **79**, 101
